

# CSE215L Programming Language II Lab

North South University

LAB 02

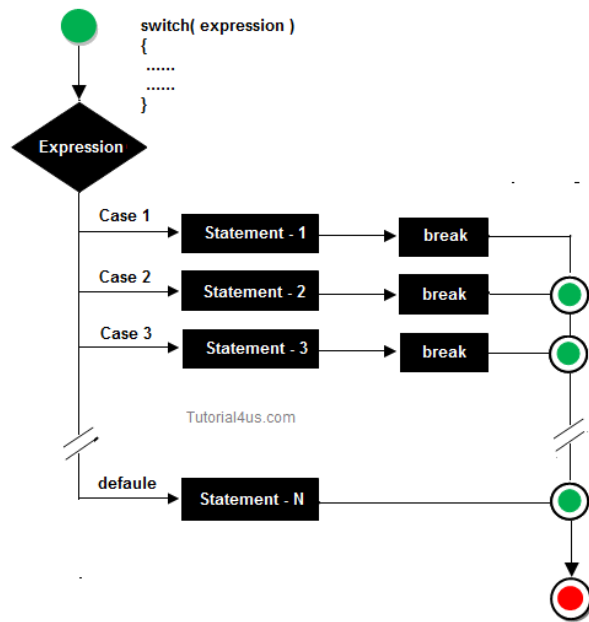

Lab Instructor: Muhammad Abrar Hussain

## Objective:

- To learn to use conditional statements (if, else, switch case)
- To learn the usage of loops (for, while, do-while)

TOPICS	CODE-SNIPPET
<b>if else</b>	<b>switch</b>
<pre>if(condition){   // do something } else{   // do something else }</pre>	<pre>switch(case){   case 1:     // do things for case 1     break;   case 2:     // do things for case 2     break;   default:     // do things for default case }</pre>
<b>while</b>	<b>for</b>
<pre>while(condition){   // do something }</pre>	<pre>for(int i = 0; i &lt; 10; i++){   // do something }</pre>

### Tasks:

1. Write a program that takes an integer and determines if it's odd or even. Use switch cases to produce result.

2. Write a program that takes an integer and determines if it's prime or not. A number is prime if it is divisible by 1 and itself only, i.e. 2, 3, 11, 37 etc.

3. Write a program that prints the multiplication table from 1 to 5.

1 X 1 = 1

1 X 2 = 2

.....

5 X 10 = 50

4. Write a program that takes an integer and prints its divisors, i.e. divisors of 12 are 1, 2, 3, 4, 6
